THE LARGE DOUBLE FEED DOORS

on the Sunshine furnace provide an opening deep and wide enough to admit great rough chunks of wood that would either have to be wasted, or chopped up for an ordinary furnace.

As for putting coal in the Sunshine, why, it's

the casiest thing imaginable!

Such a generous opening would be next to impossible to miss. And you can easily deposit the coal in any spot you desire. .

After you have experimented with small feed-doors, and hit the edge of the door frame a few

times, you will recognize more completely the case and advantage of the Sunshine method. The illustrations hint at the difference.

If you will examine the fire-pot of the Sunshine you will notice that the sides are straight up and down. On many furnaces the fire-pots slope, forming a rest on which the ashes accumulate.

As ashes are non-conductors of heat they prevent the fire-pot from radiating as much heat as it should; they clog up the draft and deaden the fire.

But the Sunshine fire-pot is a wonderful radiator that the Junsaine fre-pot is a wonderful remater-of heat. No ashes can cling to the straight, sheer sides of its fire-pot. The face, red-hot coals are always sing up to them. There is nothing to prevent the radiation of every unit of heat produced by the fire!

The Sunshine is the most scientifically and perfectly con-structed furnace. It

radiates most heat with less consumption of fuel. It is the easiest-managed, cleanest, greatest labor and fuel economizer you can buy. If your local dealer

does not handle the Sunshine, write direct to us for Free Booklet.

No losses were made on investments in 1906, and, so far as can be foreseen, none are anticipated. The balance of real estate acquired by foreclosures in former years was disposed of during the year at a profit. Only one small parcel valued at 8900, remains. OUSEKEEPERS who are wise will not be persuaded into purchasing the unreliable baking powders which some dealers wish to sell for the sake of the

additional profit derived therefrom. Crudely mixed from low-grade, impure ingredients, such powders cost but half as much to make as the highly refined, absolutely pure Royal Baking Powder, although retailed at the same price. They are unwholesome and lacking in leavening strength.

ROYAL BAKING POWDER gives the greatest value for its cost, and there is no other baking powder or leavening preparation that will give such satisfaction, or make such pure, wholesome and delicious food, or which in practical use will be found so economical.
